

# National Weather Service

## Wilmington, NC

**Outlook Period:** Mon. Oct. 19<sup>th</sup> – Fri. Oct. 23<sup>rd</sup>  
**Time Issued:** 10 AM, Mon. Oct. 19<sup>th</sup>, 2020

**Prepared by:** NWS Wilmington NC

### Warmer Temperatures & Humidity Return

**Overview:** High pressure that brought beautiful weather over the weekend will weaken as warmer and more humid air returns by mid-week. A few showers are possible mid-week with a slight chance of an isolated thunderstorm. Distant swells from [TD27](#) will bring an elevated rip current threat all week.

### Impacts:

- Minor coastal flooding expected to continue through mid-week
- Distant tropical system to bring increased swell, rough surf, and an elevated rip current threat this week

### Ongoing River Flooding:

- [Pee Dee River at Pee Dee, SC](#) (Minor flooding continues through late week)

### 5-Day Forecast
